DETAILED ACTION

Allowable Subject Matter

1. The indicated allowability of claims 1-13, 15-17 and 19 is withdrawn in view of the newly discovered reference(s) to Gilding et al (U.S. Patent 4,704,130 A). Rejections based on the newly cited reference(s) follow.

Election/Restrictions

2. Claims 14, 18 and 20-26 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 24 March 2005.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Art Unit: 1732

4. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary.

Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

5. Claims 1-13, 15-17 and 19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gilding et al (U.S. Patent 4,704,130 A) in combination with Gogolewski (U.S. Patent 4,770,664 A).

Gilding et al (see the entire document, in particular, col. 4, lines 27-45; col. 5, lines 52-56) teach a process of making a biocompatible porous prosthesis as set forth in the instant claims, except for that aspect of the porous support, which is taught by Gogolewski (see the entire document, in particular, col. 2, lines 51-60) and such would have been obvious to one of ordinary skill in the art at the time the invention was made in

Art Unit: 1732

the process of Gilding et al in view of Gogolewski principally in order to make a desired final product.
